GAMECOMP WORKSHOP SCENARIOS

Welcome to the latest update on Work Package 3 of the GameComp project, focusing on the development of innovative workshop scenarios to promote sustainability competencies among youth. This initiative is part of our broader mission to equip young people and youth workers with the tools to lead the green transition.

Work Package 3, titled GameComp Workshop Scenarios, is a core element of the GameComp project, designed to foster sustainability competencies outlined in the GreenComp framework. By leveraging co-designed workshop scenarios, this initiative aims to make learning about sustainability interactive, engaging, and impactful.

Each partner organisation have created 12 workshop scenarios including five different activities per workshop. The themes of 60 workshops have been associated with the GreenComp Framework, the European sustainability competence framework

Results of WP3:

60 Scenarios designed to be adaptable for various settings;

Implementation Guide on how to create workshops;

Facilitation Guidelines to adopt the workshops in trainings;

Training of Trainers who test the 60 workshop scenarios.

Specific objectives of the workshops:

- Develop 60 Workshop Scenarios: Create a diverse set of scenarios to address the 12 competencies outlined in GreenComp.
- Empower Youth Workers: Provide them with practical tools and instructional materials to facilitate impactful workshops.
- Foster Youth Leadership: Encourage young participants to engage as active agents of change for sustainability.

Validation and Piloting

Each workshop scenario undergoes rigorous testing to ensure it meets the needs of diverse youth communities and aligns with GreenComp's objectives.

Resource Development

Beyond the workshops, instructional materials and facilitation guides are being developed to support youth workers in delivering these sessions effectively.

What is GreenComp?

GreenComp is a framework that defines sustainability competences. It offers a shared foundation for learners and guidance for educators, promoting a unified understanding of sustainability as a competence.

These competences empower learners to think critically and systemically, take action, and build a solid knowledge base for those committed to the well-being of our planet now and in the future.
